PROFESSIONAL SUMMARY:

Frontend Developer with 5+ years of experience building scalable enterprise applications using React.js, Vue.js, JavaScript, TypeScript, Redux, and modern frontend technologies. Proven expertise in delivering secure, high-performance solutions across Banking, FinTech, Healthcare, and Governance domains. Experienced in Agile environments with end-to-end ownership, from requirement analysis and technical design to production deployment and support. Passionate about building impactful products while continuously enhancing technical and leadership capabilities.

IT PROFICIENCY SKILLS:

Frontend Frameworks/Libraries : React.js, Lit.js, Vue.js, Gatsby.js, Next.js.
State Management : Redux, Vuex.
Programming Languages : Javascript (ES6+), TypeScript.
Web Technologies & Styling : HTML5, CSS3, LESS, SASS/SCSS.
UI Libraries/CSS Frameworks : Ant Design, Material UI, Reactstrap, Rsuite, Kendo UI.
API Integration : REST APIs, Axios, GraphQL.
Tools : Postman.
Database : MySQL.
Version Control : Git, GitHub, GitLab.
Development Methodology : Agile / Scrum.

WORK EXPERIENCE:

April-2024 to Present: Working as System Engineer at Tata Consultancy Services (TCS).

Client: Standard Chartered Bank(SCB)
Project: Data Risk Assessment(DRA – PIA & DS)
Role: Frontend Developer
Duration: April 2024 – Present

Enterprise Data Risk Assessment (DRA) platform used by Standard Chartered Bank to assess, monitor, and mitigate data-related risks across global business units. The system enables regulatory compliance through structured Privacy Impact Assessment (PIA) and Data Sovereignty (DS) workflows, incorporating sensitive data identification, risk evaluation, and governance automation.

- Engineered scalable enterprise frontend applications using React.js and Lit.js with reusable component architecture, improving code maintainability and UI scalability.
- Developed dynamic rule-driven workflows with complex form validations, secure Role-Based Access Control (RBAC), and responsive UI components.
- Implemented performance-optimized UI components ensuring improved rendering efficiency and user experience.

- Performed end-to-end feature ownership including requirement analysis, technical design, development, testing coordination, and production deployment.
- Participated in Agile/Scrum processes including sprint planning, backlog grooming, effort estimation, and release planning.
- Collaborated with cross-functional teams (backend, QA, business analysts) to deliver high-quality enterprise solutions.
- Resolved production issues through root cause analysis (RCA), improving system stability and application performance.
- Ensured secure coding practices and compliance with enterprise development standards through peer code reviews.

April-2022 to March-2024: Senior Software Engineer at Aptomate Digital Software Services Private Limited.

- Designed and developed scalable web applications using **React.js, Redux, Vue.js, Vuex, Material UI, Reactstrap, SCSS, and CSS**, delivering high-performance and responsive user interfaces.
- Integrated real-time communication capabilities using **Sendbird**, enabling seamless chat, voice, and video interactions within applications.
- Implemented secure financial data integrations using the **Plaid API**, ensuring reliable and compliant data processing.
- Delivered frontend solutions across HealthCase, FinTech and Workforce platforms serving thousands of end users, improving usability and application responsiveness.
- Led frontend architecture and development for key platforms including:
 - ✓ **Happyworkin** – Healthcare job marketplace connecting medical professionals and hospitals.
 - ✓ **Clyear** – AI-driven Accounts Payable automation platform with intelligent invoice processing workflows.
 - ✓ **ACHC** – Healthcare accreditation management system built using Vue.js and Kendo UI.
 - ✓ **AgentBuddy and Paygov** workforce/fintech platforms.
- Owned complete feature lifecycle including requirement analysis, sprint planning, development, code reviews, deployment, and production support.
- Collaborated directly with clients and cross-functional teams to deliver stable, high-quality releases within Agile environments.

May-2021 to March-2022: Product Engineer at Sketch Brahma Technologies PVT LTD.

- Developed and maintained scalable web applications using **React.js, Redux, Next.js, Bootstrap, and SCSS/LESS**, ensuring responsive and performance-optimized user interfaces.
- Contributed to product feature development, enhancements, and issue resolution, ensuring stable and high-quality releases.
- Collaborated directly with clients and leadership teams to gather and analyze business requirements, translating them into effective technical solutions.
- Partnered with Product Design and cross-functional teams to define implementation strategies, plan sprint deliverables, and ensure timely project execution.
- Actively participated in Agile development cycles, maintaining code quality and adhering to best practices.
- Contributed to **Chaos Genius** – Open-source business observability platform for KPI monitoring and automated anomaly detection for data-driven decision making.

Oct-2020 to March-2021: Software Engineer Trainee at KloudOne (Kloud Technology Works Pvt Ltd).

- Contributed to the development and enhancement of web applications in collaboration with the Product Team, ensuring functional and user-friendly interfaces.
- Built responsive and visually consistent UI components using **React.js, Gatsby.js, Bootstrap, and Ant Design**, following modern frontend development standards.
- Applied best practices in component-based architecture, code structure, and UI performance optimization.
- Worked on **KloudLearn**, a next-generation e-learning platform that enables organizations to create, manage, and deliver structured digital training programs with course tracking and user progress management.
- Successfully delivered sprint commitments with minimal supervision, demonstrating adaptability and rapid learning in a fast-paced product environment.

EDUCATION:

2016 – 2020: Bachelor of Engineering(Computer Science Engineering), CGPA of 7.0 in C Abdul Hakeem College of Engineering and Technology - Vellore

CERTIFICATION:

- GitHub Copilot GH-300 Certification – Feb 2026

AREA OF INTEREST:

- Front End Development.
- Web & Mobile Development.
- Full Stack Development.
